Office Action Summary

RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a combination of an earphone cable-receiving casing and a power recharge unit on the casing, classified in class 379, subclass 430.
 - II. Claim 16, drawn to a cable-receiving casing having a cable end which can be connected to an earphone or a power recharge unit, classified in class 379, subclass 438.

2. The inventions are distinct, each from the other because:

Inventions Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions involve a cable rewinding casing having a recharging unit in Group I which does not require to connect to a connector having a recharge unit as it is required in Group II.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

In Group I, it further contains the following species:

Specie 1, claims 2-3, 6, 8, the structure of the cable rewinding mechanism;

Specie 2, claim 4, the clamp;

Specie 3, claims 5, 7, 11-15, the structure of the recharge unit;

Specie 4, claim 9, a connector;

Specie 5, claim 10, the circuit board and its indicator lamp.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic in Group I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2642

(NOTE: applicant is advised to elect one group from Groups I and II. If Group I is elected, applicant is advised to elect one specie from this Group I for examination purpose).

4. A telephone call was made to the law firm of the attorney of record on 10-14-04 to request an oral election to the above restriction requirement, the examiner was told that it has a Taiwanese inventor, and a written restriction has been requested.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728. The examiner can normally be reached on Mon.-Fri. from 8:00 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on 703-305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
